AIRCRAFT AND MISSILES

INTRODUCTION

Information included in this section provides data pertaining to procurement and acceptance of aircraft and missiles for the USAF, Military Assistance-Service Funded (MASF), Foreign Military Sales (FMS), Military Assistance Program (Grant Aid), and other Services/Agencies.

The aircraft and missile tables reflect the procurement programs, by fiscal year funding, for FY 1977 and prior, and fiscal year 1978. The tables also show quantities accepted, by month, during fiscal year 1978. Additional tables show acceptances planned and acceptance data for aircraft and missiles with procurement quantities in FY 1977 - FY 1978. Acceptance data for Aircraft and Missiles are obtained under the provisions of AF Regulations 84-8, dated 26 August 1974. Planned Production data by FY Funding Schedules, are obtained from the WA and WM Aircraft and Missile Production Planning Schedules, as changed by Procurement Authorizations issued by Headquarters USAF/RDPXP.

DEFINITIONS

MISSION/DESIGN/SERIES - Air Force Regulations 82-1, dated 27 March 1974, Designating and Naming Defense Equipment (Military Aircraft, Rockets, and Guided Missiles) established a uniform system for designating and naming military aircraft and missiles. DoD Directive 4120.15-L, 15 April 1974, Model Designation of Military Aircraft, Rockets and Guided Missiles, lists the current designation for each of these aerospace vehicles.

ACCEPTANCE - Aircraft, missile or drone which has been shop-assembled and fully inspected by constituted USAF, Navy or Army production authorities, and for which the title, responsibility, and accountability has been assumed by the contracting agency of the recipient.

AIRCRAFT - A heavier-than-air vehicle, designed primarily for flight in the atmosphere, which has incorporated in its prime design the ability and/or requirement for human occupancy.

DRONE - Any aircraft or missile modified or produced to perform the mission of a target for weapon evaluation or crew training, or for reconnaissance, and which has incorporated into its prime design the capability to be flown by remote control.

GUIDED MISSILE - Unmanned, self-propelled vehicle designed to move in a trajectory or flight path all or partially above the earth's surface and whose trajectory or course, while the vehicle is in motion, is capable of being controlled remotely or by homing systems, or by inertial and/or programmed guidance from within. This term does not include space vehicles, space boosters, or Naval torpedoes, but it does include target and reconnaissance drones.

Medical

PART VI

PART VI

MEDICAL

DEFINITIONS

ADMISSION - When applied to: (1) Active duty military personnel, the term indicates that the individual has been placed under treatment as a quarters patient or as a hospital bed occupant on an excused-from-duty basis. (2) A civilian patient, the term indicates that a patient has entered a hospital as a bed occupant, for some form of treatment.

ADMISSION RATE - The admission rate is a measure which indicates the frequency with which military patients are excused from duty for medical reasons. Hence, the admission rate is based on admissions from duty. These are annual admission rates, which show the number of admissions that would occur during a year if admissions occurred throughout an entire year at the same frequency as in the period of observation. The annual admission rate per thousand average strength is computed as follows:

Number of admissions during the period X Number of such periods in a year X 1,000 Mean strength during the period

AIR FORCE PERSONNEL - Air Force military personnel on active duty, not including Air Force Academy cadets or personnel on active duty for training.

AVERAGE OCCUPIED BEDS - The average of the numbers of patients occupying beds in hospitals as of midnight of each day in the period.

COMPLETE PHYSICAL EXAMINATIONS - Complete physical examinations include only those recorded on the Report of Medical Examination (Standard Form 88); physical inspections of food handlers or barbers are not included nor are examinations of personnel who are ill.

HOSPITALIZED RATIO - The hospitalized ratio is the weighted average of the proportions of strength in an inpatient status each day (of the period for which it is computed). It differs from the noneffective ratio in that it includes only bed occupancy days in hospitals. The ratio is computed per 100 strength as follows:

Number of bed occupancy days in the period X 100 Mean strength X Number of calendar days in the period

INPATIENT ADMISSION - The enrollment of a patient for care on the wards of a hospital.

NONEFFECTIVE RATIO - The medical noneffective ratio is the weighted average of the proportions of strength not available for duty, for medical reasons, each day (of the period for which it is computed). Such persons may be under treatment as inpatients, in quarters, on sick leave, or AWOL from a patient status. The ratio is computed for a specified period, per 100 strength as follows:

Number of sick days in period X 100
Mean strength X Number of calendar days in the period

OPERATING BEDS - This term applies to beds with staff and equipment ready for treatment of patients in hospitals.

OUTPATIENT VISITS - One visit is counted each time an outpatient or quarters patient receives advice and/or treatment at an organized clinic or specialty service. More than one visit per patient may be counted on a given day.

AEROSPACE PHYSIOLOGY - Program of instruction to familiarize the flyer with the physiological and psychological stresses of modern military aviation and space flight, and to prepare him to meet these stresses successfully. Physiological training officers are also responsible for technical monitoring of the USAF Compression Therapy Program; managing the training function of the Tri-Service pressure suit program; monitoring special life support equipment and operations functions; and for training aircrew members in functions of personnel protective equipment which is used in flight, escape from aircraft, and survival.

THE JUDGE ADVOCATE GENERAL

INTRODUCTION

The Office of The Judge Advocate General provides statistical data reflecting punishment of members for offenses against military law. The statistics are derived from the Automated Military Justice Analysis and Management System (AMJAMS), AFM 111-351.

Table 119 provides by command and grade the number of nonjudicial punishment actions taken pursuant to the Uniform Code of Military Justice (UCMJ), Article 15.

Table 120 reflects by command, the types of nonjudicial punishment imposed against officers and enlisted members.

Table 121 is a report of court-martial activities reflecting, by command, the number of military personnel subject to court-martial jurisdiction pursuant to the UCMJ, Article 2 and the number tried by type of court.

Table 122 provides by command and type court, the number of trials convened, and the court-martial and Article 15 rates per 1,000 average assigned and attached military strength.

Table 123 reflects by command and type court, the number of convictions and acquittals.

DEFINITIONS

Components - Reserve Forces and Air National Guard

PART VIII

PART VIII

COMPONENTS - AIR FORCE RESERVE

INTRODUCTION

The Air Force Reserve personnel statistical data contained in this section pertains to those reservists not on extended active duty (EAD). These statistical tables are designed to show the composition and characteristics of Air Force Reserve personnel and reflect the strengths and grades, at specific intervals throughout the fiscal year.

In general, the definitions contained herein have been taken from, or are in conformity to, the definitions included in the Air Force Regulations 45 series and Air Force Regulation 35-41.

DEFINITIONS

ACTIVE DUTY FOR TRAINING - A tour of AD reserve training under orders which provide for automatic reversion to the ARF not on AD when the specified period of AD is completed. It includes annual tours, special tours, school tours, and the initial tour performed by enlistees without prior military service.

ACTIVE DUTY FOR PAY ONLY - Reservists assigned to training categories which provide for pay only for their annual two-week tours or other special AD tours. They may participate in additional inactive duty for training but for points only.

INACTIVE DUTY TRAINING - Training performed by a USAFR member (while not on AD) for which pay and point credit may be authorized.

MOBILIZATION AUGMENTEE - A Ready Reserve member not in a unit organized to serve as a unit but assigned against an individual manpower authorization, normally in but not limited to a Regular Air Force unit.

OBLIGATED RESERVE SECTION (ORS) - The ORS is an active status section of the Ready Reserve administered by the Air Reserve Personnel Center (ARPC). Individuals without assignments who have an unfulfilled Military Service Obligation or active service obligation are assigned to ORS pending completion or termination of their obligation.

STANDBY RESERVE - Consists of the non-affiliated Reserve Section (Active Status) and the Inactive Status List Reserve Section (ISLRS) assigned to and administered by ARPC. Members may only be ordered to EAD in time of war or national emergency declared by Congress.

RETIRED RESERVE - Consists of USAFR members who, on the basis of law, have been determined eligible for retirement with or without pay and who are assigned upon their request or by law to the Retired Reserve.

REINFORCEMENT DESIGNEE - A Ready Reserve member assigned to an Air Reserve Squadron, the Ready Reinforcement Personnel Section or the Obligated Reserve Section. They represent a pool resource providing the Air Force with an added manning capability for needs which can be anticipated but which cannot be precisely established by grade and AFSC. They are in non-pay status.

RESERVE OFFICER REPRESENTATION ON AIR FORCE STAFFS (STATUTORY TOURS) - USAFR officers assigned under 10 USC 265, 8033, 8019 to USAF staff positions and major commands to formulate plans and policies affecting the USAFR.

FISCAL

INTRODUCTION

This section reflects the funding operations of the various Air Force appropriations and/or funds with the respective major programs for the fiscal years indicated in the title of each table.

EXPLANATION OF YERMS

APPROPRIATION - An authorization by an Act of Congress to incur obligations for specified purposes and to make payments therefore out of the Treasury.

APPROPRIATION ACCOUNT - An account established to make amounts available for obligation and expenditure from the Treasury. Appropriation accounts include not only accounts to which money is appropriated, but also revolving funds, working funds, trust funds, etc. Appropriation accounts do not include official deposit funds.

APPROPRIATION REIMBURSEMENT - Amounts collected or to be collected for commodities, work or services furnished or to be furnished to another appropriation or fund or to an individual, firm or corporation which by law may be credited to an appropriation or fund account. Amounts to be collected include accounts receivable, reimbursements earned but not billed and amounts anticipated for the remainder of the year. They may also include inter-agency orders accepted and on hand for which delivery has not been made to the extent that this order is a valid obligation of this ordering agency and the collection will be credited to the appropriation being reported.

BUDGET PROCRAM - A subdivision established under an appropriation to identify a significant segment of Air Force operations.

DISEURSEMENT - The amount of expenditure checks issued and cash payments made, net of refunds received. Disbursements include all advances.

EXPENDITURE - Payment of obligations.

OUTLAY - Gross payments less reimbursements, refunds, and loan repayments received and credited to the appropriation or fund account. Consists of "expenditures" and "net lending". The terms "outlay" and "expenditures" are virtually synonymous for the Air Force, since the only difference is a relatively insignificant amount of "net lending".

 $\overline{\text{FUND}}$ - A sum of money or other resource authorized by law to be set aside and to be used or expended only for specified purposes.

OBLICATION - The amount of an order placed, contract awarded, or service received, or any transaction which establishes a legal requirement for the ultimate disbursement of funds.

OBLIGATIONS INCURRED - Amounts of orders placed, contracts awarded, services received, and similar transactions during a given period requiring future payment of money.

PROGRAM YEAR - A concept of accounting for funds, obligations, and expenditures under a no year appropriation by identification of transactions in fiscal year segments identified by the fiscal year in which individual items were planned for obligation, without regard to the fiscal year in which the transactions were actually accomplished.

PROJECT ACCOUNT CLASSIFICATION - A subdivision of an appropriation or fund for administrative use.

UNLIQUIDATED OBLIGATION - An obligation incurred for which payment has not been made.

UNOBLIGATED BALANCE - That portion of an authorization which has not been obligated.

TRANSPORTATION

INTRODUCTION

The data included in this section represent the actual movement of people and things world-wide.

Military Airlift Command (MAC) data shown herein represent movement by the Airlift Service Industrial Fund of traffic for all services and to a minor extent for other agencies. The Airlift Service Industrial Fund began operation at the beginning of Fiscal Year 1958.

Tables reflecting movements out of AF Continental US (CONUS) installations via commercial transportation refer to traffic where movement is accomplished by a bill of lading or a transportation request. Data as shown herein include movements by Air Force for other services and do not include movements for the Air Force by other services. Data are for the period in which traffic moved rather than for the period of payment for transportation service.

DEFINITIONS

LONG TON - 2,240 pounds.

 $\frac{SHORT\ TON}{MEASUREMENT\ TON\ (M/T)} - Unit\ of\ volume\ displacing\ 40\ cubic$ feet of space.

SPACE AVAILABLE TRAVEL - Space which is surplus after all space required traffic has been accommodated and which would otherwise be unused.

 $\begin{tabular}{lll} {\bf SPACE} & {\bf REQUIRED} & {\bf TRAVEL} & {\bf Transportation} & {\bf space} & {\bf against} \\ {\bf which} & {\bf a} & {\bf requirement} & {\bf was} & {\bf accepted} & {\bf and} & {\bf anssignment} & {\bf made.} \\ \end{tabular}$
